

Agnet Turnaround

Take communication to the next level

Agnet Turnaround is a smart and secure collaborative application designed to meet the most critical challenges faced by teams on tarmac: human resources, time management, operational efficiency, and customer relationship, among others.

Whatever the size or scope of your organisation, Agnet Turnaround is a ready to use digital solution with instant operational benefits.

Agnet Turnaround has been designed for both users in the field and their managers. From contracts to assignment and reporting, Airbus offers complete operational features and innovative services to improve performance and pave the way to automation.

Why choose our flight centric tool? Real time flight status, instant communication and data sharing for effective collaboration among the different turnaround stakeholders.

click & Fly

It's efficient

When something is going wrong you need to act immediately, contact the right people and support them to minimise disruption. Every minute counts. Our solution is all about operational efficiency by providing instant communication among the team, generating automatic reports, smart alerts capabilities and much more.

It's easy

Ground staff often face urgent challenges that require immediate support, taking into account specific constraints such as bad weather conditions, a noisy environment or occupied hands. We have designed our turnaround application to support execution, ease deployment and get instant acceptance and benefit from users.

It's open

Integration capabilities bring additional value to ground handlers, airports and airlines such as invoicing, enhanced flight data and enriched rostering. What about opening your digital environment through our collaboration functionalities to increase efficiency?

Operational efficiency is about instantly contacting the right people, taking the right decision at the right time and support teams in the field. Not only does collaboration help reduce delays but it also offers additional benefits to optimise turnaround time.
